NOTE.—The special report, to which the above index belongs, embraces only such chapters in a comprehensive survey of national education in different countries as were prepared in the office of the Commissioner of Education subsequent to his annual report in 1865 to supplement and complete the work begun by him before his connection with the office, the details of which, when ready for publication, will be seen in the following analysis of subjects. The closing part relating to American States will embrace a comparative view of these systems in reference to the condition and improvement of our several State and city systems.
